

I-LOOK

SEWER LEVEL

RAUSCH

Full HD
1920 x 1080

SEWER CAMERA

The mobile, battery-operated „I-Look Full HD“ inspection unit enables the immediate assessment of the condition of wastewater pipes. Even low-lying pipes can be easily inspected from adjacent manholes thanks to the 12-metre-long pole.

EFFICIENT CAPTURE

The I-Look Full HD gives you a quick and informative view of the pipework.

Even remote manholes and sewers can be reached thanks to the compact transport case. The image and video documentation can be used to plan inspection resources more efficiently and prioritize further measures.

Thanks to the heated sapphire lens, the „I-Look Full HD“ delivers razor-sharp images even when there are large temperature differences.

TECHNICAL HIGHLIGHTS:

- Full HD channel mirror incl. transport case
- Accessories: 3 rechargeable batteries, charger and accessories
- Pressure-monitored full HD camera in aluminum housing (IP68)
- 30x optical and 12x digital zoom, electric tilt incl. safety slip clutch
- Distance measurement via laser
- Sapphire glass incl. front glass heating (no fogging)
- Data acquisition on Android tablet
